- Developing the mind,
- Increasing coordination between body and mind,
- Integration into the community; socialization,
- Enjoying life,
- Living on their own or with minimal assistance,
- Living in harmony with the group if not living on its own.

Individual Education And Development Program

- A one-on-one special education teacher gives the individual education and development program. In addition, the psychologist and handicraft teacher support the education.
- First, the person's personal characteristics and social life who will receive the training are analyzed.
- According to the information obtained, an individual training program is prepared and implemented.

Classroom Education

It is an education given in classes of 8-10 people, structured following the level of intelligence and socialization.

It is given in coordination with individual training.

This program includes lessons for collective life, social studies, basic mathematics, life information, health information, and religious studies education.

There are five different categories of education classes in our Center.
